

Acoustic panels made of wooden slats

ZENWOOD  D
HÉRITAGE

Wooden acoustic panel

DURABLE AND ENVIRONMENTALLY FRIENDLY MATERIALS

The base of the product is made from a 9mm thick polyester material obtained from a recycling process. The material meets the requirements of global recycling standards, does not contain any substances harmful to health and complies with the fire resistance standard EN13501 B-S1, D0.

Wooden acoustic panel

SOUND ABSORBING PERFORMANCE OF DIFFERENT MATERIALS

Sound-absorbing PET panel (polyester fiber sound-absorbing panel) has good performance in medium and high frequency sounds. MDF slats absorb echo and reverberation. Thus, their combination ensures adequate sound energy, high performance of medium and high frequency sound and provides a quiet and more pleasant environment.

Wooden acoustic panel

DURABLE MATERIAL

The wooden slat acoustic panel not only provides aesthetic improvements and acoustic excellence, but also uses only environmentally friendly materials. All materials are non-toxic and harmless to the human body, and have obtained authorized certifications.

Wooden acoustic panel

FUNCTIONAL PRODUCT WITH SOUND ABSORBING SOLUTION & MODERN DESIGN

Our wooden slatted acoustic panels can be used to create luxurious and beautiful slatted walls and ceilings that add a modern touch to your room. The panel is soundproof and is able to eliminate reverberation in the room, which can greatly improve the acoustic effect in the room.

FLAME RETARDANT

Our panels comply with ASTM E84 Class A and ISO 13501 B1 standards.

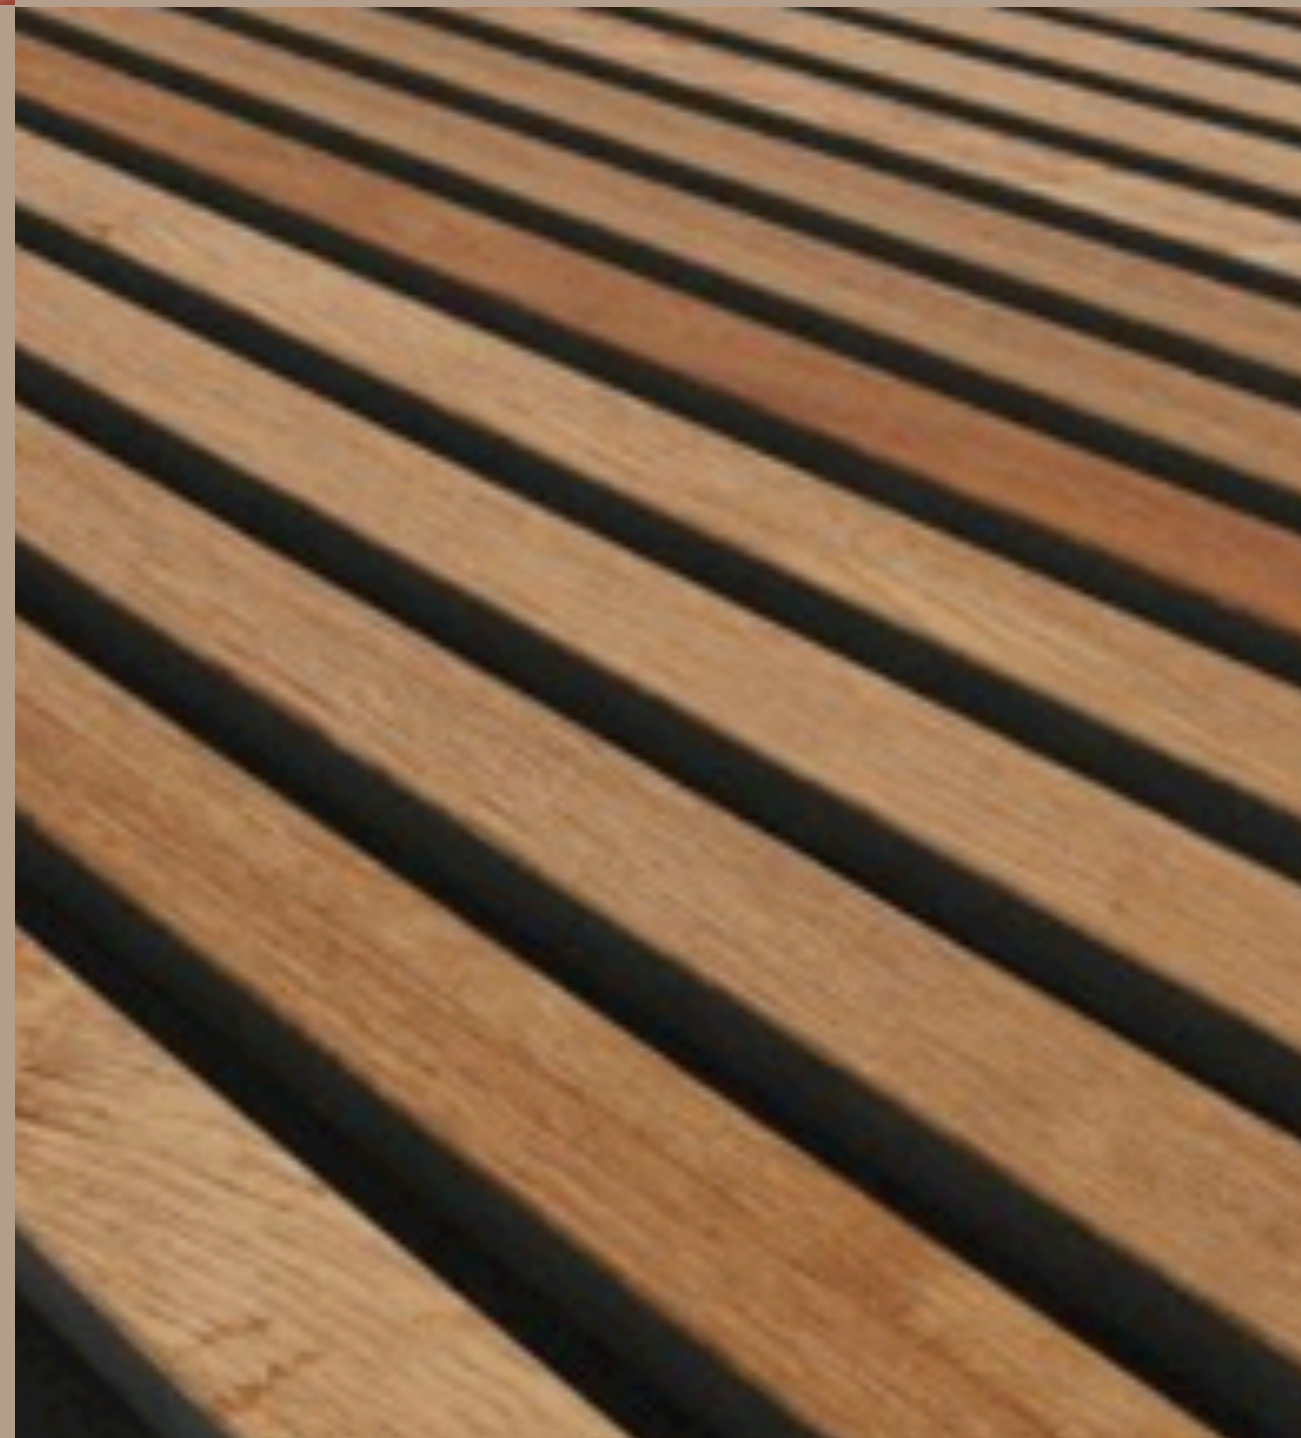

EASY TO INSTALL

Installing acoustic panels can be done with minimal DIY construction skills.

STABLE PRODUCT QUALITY

Our panels are soundproof and perfectly decorative, providing you with a pleasant and calm environment.

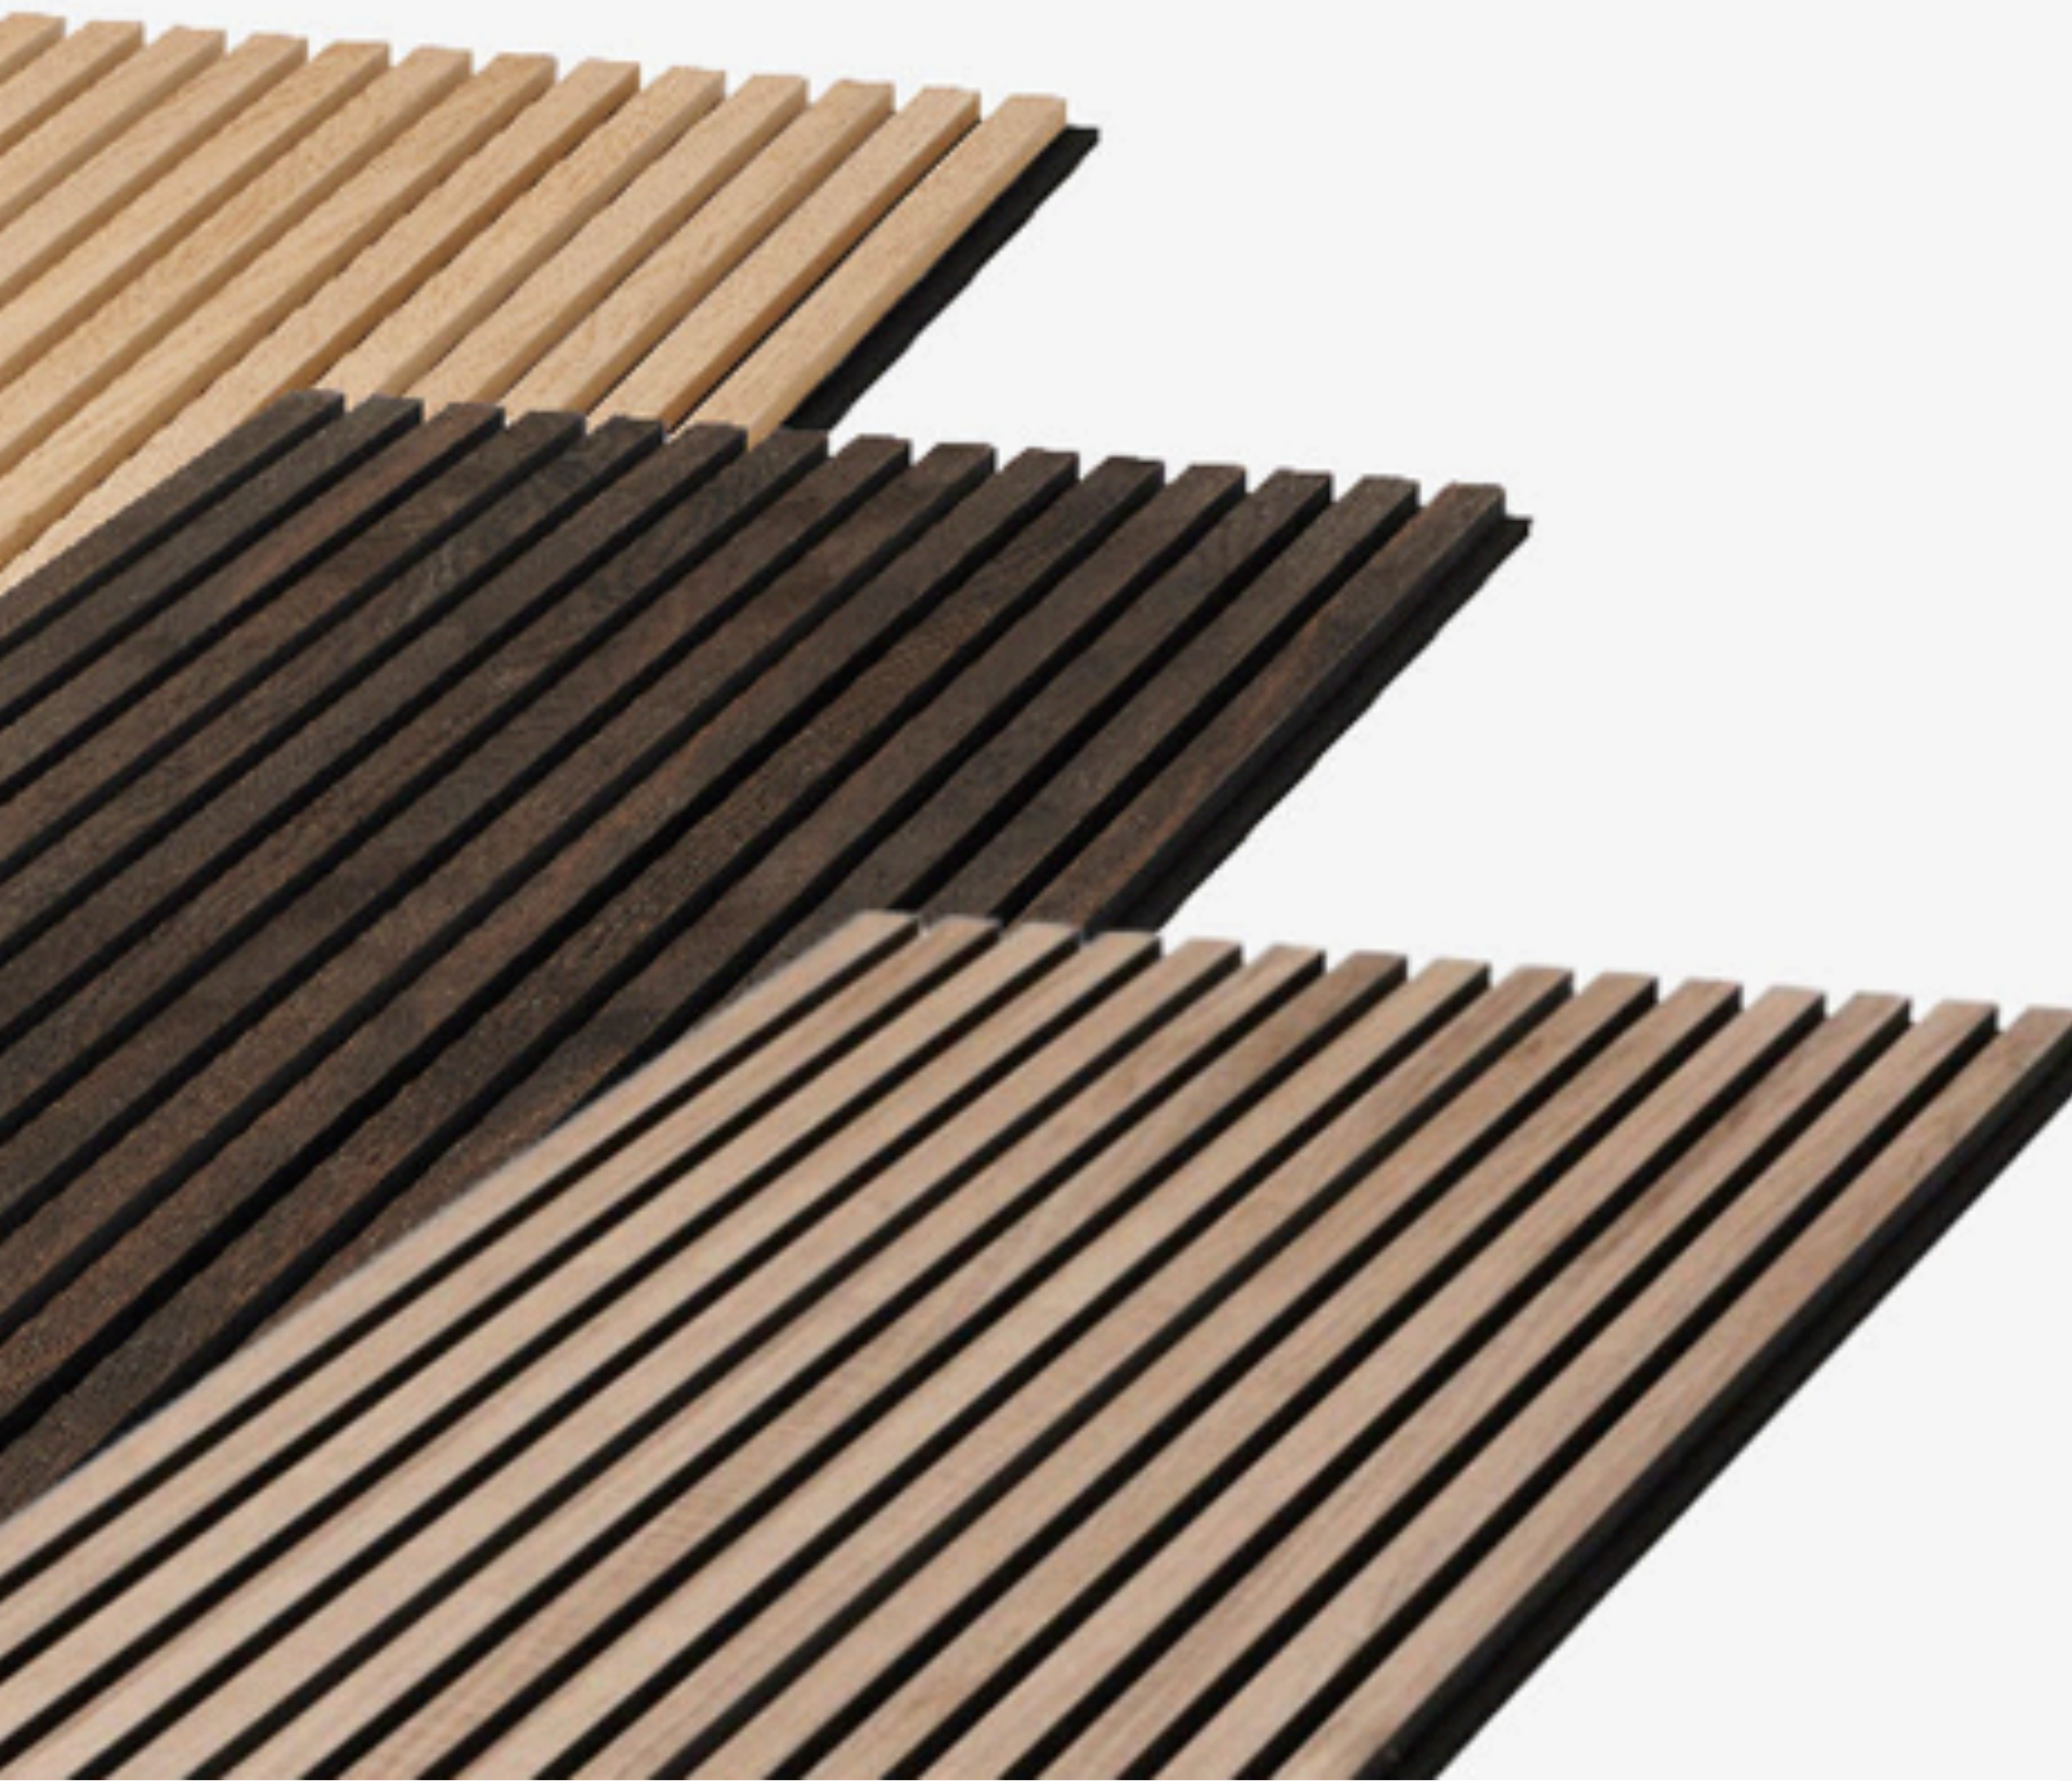

APPLICATION

A wide range of applicable scenarios like industrial buildings, home decoration, hotels and commercial buildings, etc.

Wooden acoustic panel

ARTISTIC WOODEN SOUND- PROOFING PANEL

This is a stylish and easy to install wall and ceiling panel. It not only has a decorative effect, but also has the effect of absorbing and amplifying sound. The wooden slat acoustic panel perfectly embodies the modern style and can quickly enhance your space to achieve the most artistic visual effect.

Wooden acoustic panel

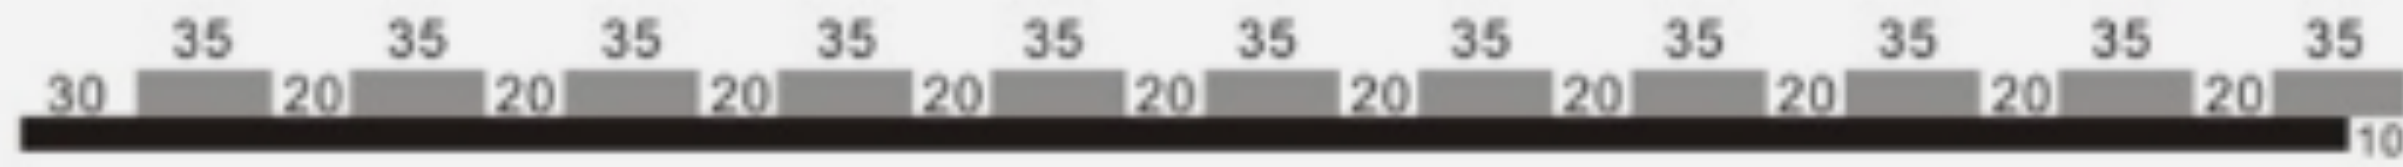

ACOUSTIC PROPERTY

It offers the best solution for effective sound absorption, while reducing the reverberation time of ambient noise. The panel achieves an absorption coefficient of 0.97 at a frequency of 1000 Hz, and loud sounds as well as standard room noise with frequencies ranging from 500 to 2000 Hertz. If you want better absorption, it is recommended to place a 45mm layer of insulation behind the panel. The solution will improve the acoustic quality of the panels.
